Tower T.I.M.E. Program

TIME. It seems like there is never enough of it. We're always looking for ways to save it. And the old expression "time is money" has never been more true than in today's business climate.

Tower Fasteners announces a new program designed to help companies save valuable time and thereby reduce cost. The program, appropriately enough, is called T.I.M.E. (Total Inventory Managed Electronically). Our T.I.M.E. system manages inventory by employing a state-of-the-art electronic bar code technology and customized order processing software.

With T.I.M.E., you will never have to worry about ordering or expediting a piece of hardware again! Tower does it for you. Our personnel, equipped with the T.I.M.E. system will visit your stock room on a regular basis to determine your immediate fastener requirements. The information is then electronically transmitted to Tower's mainframe computer. Using our customized software, an order will be processed for immediate, or scheduled delivery to your facility and an acknowledgment will be automatically sent to your company by fax. In addition, our T.I.M.E. administrator can deliver the replenishment directly to your stockroom and even place the parts in the allocated bins! The T.I.M.E. system is then repeated at the next prearranged visit.

Advantages

- Minimize Inventory Levels
- Eliminate MRP Reports
- Eliminate Formal Purchase Orders
- Maximize Discount Pricing
- Eliminate In-house Receiving and Inspection Costs

Perhaps the greatest advantage to using TIME to manage your fastener inventory can be summed up in one word... **FLEXIBILITY.**

For example, as a T.I.M.E. customer Tower offers our exclusive Design Assistance Program (D.A.P.) to assist your engineering and design departments in product development. At Tower Fasteners, we believe the customer should not have to modify systems to accommodate us, instead, we customize our system to accommodate the customer. T.I.M.E. allows your purchasing department to be free of the worries of buying fasteners, while ensuring only the highest quality at the most competitive prices. For more information about our T.I.M.E. system, contact your nearest Tower Fasteners service center.

Company History

Over the past 38+ years Tower Fasteners has become a leader in the field of fastener distribution and inventory management systems. Tower is committed to supplying products from only the highest quality fastener manufacturers in the world. Each of our eight stocking distribution centers is equipped with state-of-the-art quality control equipment to ensure that our customers receive products that exceed their expectations for quality.

Tower Fasteners was founded in 1967 in Mineola, NY by Thomas J. Shannon. During that first year Mr. Shannon, equipped only with a desk and a telephone, set out to build the best company in the fastener distribution industry. Mr. Shannon's philosophy was to provide his customers with the products they needed, when they needed them, without fail. On many occasions Mr. Shannon would spend hundreds of dollars to find a \$25.00 product for one of Tower's customers who had an urgent requirement. Because of Mr. Shannon's strong commitment to customer satisfaction, Tower Fasteners continued to grow year by year. The company relocated several times to larger facilities across Long Island. The first Tower distribution center, in Fort Lauderdale, FL, was opened in 1975. In 1986 Tower designed and built its current corporate headquarters, in Holtsville, NY. Additional distribution centers in New England, Pennsylvania, New Jersey, North Carolina, Mexico and Texas are currently servicing Tower customers along the East Coast and Southwest. Tower has grown from a one person organization to a company that employs over 100 people in eight states.

Today, Tower Fasteners is being managed by Mr. Shannon's seven children who have inherited his passion for excellence for his company. Each and every Tower employee shares the Shannon family's commitment to total customer satisfaction. Tower Fasteners continues to set the standard for innovation and excellence in fastener distribution.
